WINTERGATE INTELLIGENCE COLLECTIVE (WIC)

THREAT INTELLIGENCE BULLETIN – DPOS

Date: January 08, 2026

Subject: Degeneracy Police Order State (DPOS)

Prepared by: WIC Threat Analysis Cell

1. Core Identity & Branding

DPOS markets itself as a far-right, ultra-nationalist, "anti-degeneracy" political, neo-nazi LARP group operating on Discord.

Key visual/ideological markers include phrases like "Under the iron fist of National Capitalism," heavy military/police/NS-inspired aesthetics, and slogans such as "Undefeated," "Boomin'," "larp," and "Politics." It self-describes as a protector of "traditional" values against "degenerates."

Actual nature:

DPOS is a 764-derived grooming, psychological torture, and cyber-abuse network. The nationalist/anti-degeneracy aesthetic serves as camouflage, recruitment bait, and a layer of

plausible deniability. The political framing is secondary to the primary objective: the targeted psychological destruction of minors and vulnerable individuals. This is achieved through grooming, blackmail, encouragement of self-harm, circulation of CSAM-adjacent material, gore spam, doxxing, and public humiliation.

2. Confirmed Affiliations & Network Overlap

- Entity / Group: UTTP remnants

Relationship Type: Direct leadership & tactic inheritance

Evidence Level: Very High

Notes / Current Status: Core command structure originated here.

- Entity / Group: 764 accelerationist ecosystem

Relationship Type: Very strong tactical & ideological overlap

Evidence Level: Very High

Notes / Current Status: Primary source for grooming/blackmail/self-harm playbook.

- Entity / Group: TNM / TNM-adjacent structures

Relationship Type: Persistent individual crossover

Evidence Level: High

Notes / Current Status: Members still spotted in DPOS spaces post-split.

- Entity / Group: 148 / TNM-148 hybrids

Relationship Type: Ideological & personnel bleed

Evidence Level: Moderate

Notes / Current Status: Shared accelerationist & shock-content culture.

- Entity / Group: Enclave / GRS individuals

Relationship Type: Repeated individual crossover & tolerance

Evidence Level: High

Notes / Current Status: Institutional split occurred in Dec 2025, but boundary remains porous.

- Entity / Group: Various 2024–2025 raid crews

Relationship Type: Tactical cooperation & member rotation

Evidence Level: Moderate

Notes / Current Status: Many individuals cycle between UTTP/764/DPOS branding.

Critical observation:

Despite a public distancing and a late Dec 2025 peace agreement, the line between individual Enclave/GRS members and active DPOS participation remains extremely blurred. Multiple confirmed cases exist of GRS members engaging in DPOS raids, doxxing, and grooming-adjacent activity after the supposed separation.

3. Documented Abusive Tactics (764-Derived Core Playbook)

- Tactic Category: Suicide / self-harm acceleration

Specific Behaviors: Grooming toward cutting/self-harm/suicide, "do it" spam, romanticization of self-destruction

764 Overlap: Very High

Observed Severity: Critical

- Tactic Category: Blackmail & extortion

Specific Behaviors: Collecting extreme self-harm/nude content for threats, doxxing, forced compliance

764 Overlap: Very High

Observed Severity: Critical

- Tactic Category: Mass psychological terror spam

Specific Behaviors: Gore, scat, fetish, shock content floods in DMs, voice channels, servers

764 Overlap: High

Observed Severity: High

- Tactic Category: Targeted doxxing & humiliation

Specific Behaviors: Face reveals followed by AI rape edits, abuse videos, public shaming campaigns

764 Overlap: High

Observed Severity: High

- Tactic Category: False flag / victim inversion

Specific Behaviors: Accusing victims of being the real predators/degenerates after exposure

764 Overlap: High

Observed Severity: High

- Tactic Category: Coordinated mass reporting

Specific Behaviors: False reports to platforms to silence/ban victims

764 Overlap: Moderate

Observed Severity: High

- Tactic Category: Ideological grooming / love-bombing

Specific Behaviors: Fake "anti-degen" belonging leading to gradual escalation into abuse requests and grooming children typically autistic converting them into radical far righters.

764 Overlap: Very High

Observed Severity: Critical

4. Command Structure & Operational Patterns

- Central figure ("Führer"): Tomas (primary UID cluster: 1444359348628357272 plus known alts).
- Inner circle: A small group of loyal enablers handling grooming coordination, content creation, and doxxing.
- Outer layer: Disposable skid/edgelord recruits used for spam, raids, and false reporting.

Psychological manipulation cycle:

1. Love-bombing and promises of ideological belonging.
2. Gradual escalation into requests for self-harm or extreme content.
3. Blackmail once compromising material exists.
4. Public doxxing and humiliation if the victim resists.
5. Victim-blaming and gaslighting, often claiming "you're the real degenerate."

5. Current Status (as of January 08, 2026)

- Operating through multiple rotating micro-servers (20–50 members) with heavy autoban filters, indicating heightened paranoia.
- New flagship server attempts are repeatedly disrupted early; the most recent was nuked in January 2026.
- Persistent grooming and self-harm campaigns are documented weekly.
- Continued individual crossover from GRS/Enclave circles persists despite the official split.

Bottom line assessment:

DPOS is not a political group that occasionally crosses lines. It is a 764-derived grooming and psychological torture network wearing a far-right nationalist costume for recruitment and cover.

DPOS & 764 OVERLAP

WINTERGATE INTELLIGENCE COLLECTIVE (WIC)

OPEN-SOURCE THREAT ASSESSMENT – DPOS LEADERSHIP & 764 OVERLAP

Date: January 08, 2026

Prepared by: WIC Threat Analysis Cell

EXECUTIVE SUMMARY:

The leadership of Degeneracy Police Order State (DPOS) exhibits VERY HIGH likelihood (90%+ confidence) of being either former members, current affiliates, or heavy adopters of 764-derived tactics. This assessment is based on tactical, ideological, behavioral, and network overlap matching documented 764 patterns (FBI advisories, Europol reports, Inside764 series, community OSINT).

1. TACTICAL OVERLAP WITH 764 PLAYBOOK (VERY HIGH)

764 core tactics include:

- Grooming minors via Discord/Telegram/Roblox
- Love-bombing → escalation to extreme requests
- Blackmail with compromising material (nudes, self-harm, CSAM-adjacent)
- Encouragement of self-harm/suicide ("do it" spam)
- Gore/shock content as psychological terror
- Doxxing & public humiliation if victim resists
- Victim inversion ("you're the real degenerate")

DPOS leadership matches 7/7 core 764 tactics:

- Suicide/self-harm acceleration: Grooming toward cutting/SH/suicide, romanticization.
- Blackmail/extortion: Collecting extreme content for threats.
- Mass psychological terror spam: Gore/fetish floods in DMs/servers.
- Targeted doxxing/humiliation: Face reveals → AI edits, public shaming campaigns.
- False flag/victim inversion: Accusing victims of being "degenerates".
- Coordinated mass reporting: False reports to silence victims.
- Ideological love-bombing: Fake "anti-degen" belonging → escalation to abuse.

Severity: Critical across the board.

2. IDEOLOGICAL & AESTHETIC CAMOUFLAGE (VERY HIGH)

- 764 uses nihilistic/accelerationist ideology as cover (O9A roots, anti-Christianity).
- DPOS uses far-right nationalist "anti-degeneracy" framing as cover — same function: recruitment bait + plausible deniability.
- Leadership mixes extremist rhetoric with 764-style nihilism ("policing degeneracy" as justification for abuse).

3. NETWORK & PERSONNEL OVERLAP (HIGH)

- UTPP → DPOS → 764 pipeline: DPOS is a confirmed UTPP splinter. UTPP raids feed directly into 764 grooming.
- Persistent crossover with other flagged groups (TNM, Enclave/GRS individuals) despite public splits.
- Telegram gore/CSAM-adjacent trades linked to 764-style escalation.

4. SPECIFIC BEHAVIORAL RED FLAGS (VERY HIGH)

- Grooming minors for "cyber soldiers": Recruiting vulnerable youth into raids, self-harm, extortion.
- CSAM-adjacent content against minors: AI edits, gore spam, face-reveal humiliation campaigns.
- Adult leadership confirmed (not minor-led) — rules out "teen drama" defense.
- Psychological profile: Obsession with doxxing superiority, manipulative escalation.

5. CONFIDENCE ASSESSMENT

- Likelihood of 764 involvement/affiliation: VERY HIGH (90%+)
- Likelihood DPOS is 764-derived network: CONFIRMED (100%)
- Likelihood of leadership directing grooming/extortion: CONFIRMED (100%)

RECOMMENDATION

Treat DPOS leadership as active 764-adjacent predator network.

Prioritize reporting to platforms (Discord Trust & Safety), FBI IC3, NCMEC CyberTipline.

Continued blacklisting, community warnings, and monitoring of affiliates recommended.

This assessment is based on open-source intelligence, community reports, and cross-referenced patterns. No private or non-public personal data is included.

WinterGate Intelligence Collective (WIC)

Understanding COM

WHAT IS COM?

In the context of Discord and online clanning communities (especially military/gunfight/roleplay groups), "com clan" or "com" is short for "communications clan" or "competitive clan." It refers to a highly organized, structured Discord-based group that functions like a small society or military unit, with ranks, leadership hierarchies, events, raids, alliances, diplomacy, and often a strong emphasis on internal communication (via voice/text channels, bots, and announcements). These clans are typically "active" — meaning they compete, hold tryouts, host training, participate in wars or matches and engage in ongoing drama or rivalries with other com clans. Unlike casual hangout servers, com clans have a serious, goal-oriented vibe, often with their own lore, uniforms, and codes of conduct, and they view themselves as elite or professional within the niche.

Key Characteristics of Com Clans

- **Formal Structure** — Clear chain of command, ranks (e.g., recruit, officer, general), and defined roles/responsibilities.
- **High Activity & Commitment** — Regular events, tryouts, training, raids, matches, and diplomacy (alliances, treaties, rivalries).
- **Internal Communication Focus** — Heavy use of bots, announcements, voice channels, and sometimes custom tools for coordination.
- **Goal-Oriented Culture** — Treat clanning as a serious hobby or lifestyle, often with lore, uniforms, and strict codes of conduct.
- **Drama & Rivalries** — feuds with other com clans mainly.

Com clans are most common in Roblox/Discord military roleplay, gunfight, ragebait, neo-nazi or competitive scenes, where they distinguish themselves from casual or informal groups by their professionalism and structure. Understanding this term helps clarify the dynamics of many active, competitive communities on Discord and elsewhere.

Full History of DPOS

The Complete History of DPOS

- From UTPP Splinter to Exposed Extremist Network
- Issued by NCTC - NoTrac3 Counter Threat Coalition
- November 11, 2025, 09:00 AM EST
- Updated from October 13, 2025 Brief

Executive Summary:

DPOS (Degeneracy Police Order State) is no longer a shadowy troll collective—DPOS is a 764-derived grooming, psychological torture, and cyber-abuse network. The nationalist/anti-degeneracy aesthetic serves as camouflage, recruitment bait, and a layer of plausible deniability. The political framing is secondary to the primary objective: the targeted psychological destruction of minors and vulnerable individuals. This is achieved through grooming, blackmail, encouragement of self-harm, circulation of CSAM-adjacent material, gore spam, doxxing, and public humiliation, its "anti-degen" facade shattered by a 72-hour evidence storm that exposed doxxing rings, swatting threats, grooming pipelines, and blackmail campaigns.

Emerging as a "hardcore" UTPP offshoot in mid-2023, DPOS escalated juvenile raids into psychological warfare, targeting FPE, Gacha, and LGBTQ+ communities under the guise of moral policing. Led by TomasThyGreatest, it fed into 764 sextortion and Spawnism self-harm cults, manipulating kids (mostly 14 and under) into chaos tools. NoTrac3's investigations, culminating in November 2025 exposures, revealed 1,750+ linked accounts in the DTAD database, including RevGirl52's minor-adult matchmaking and Lola Bear's 47 extortion tweets. The mask is off: DPOS isn't protection—it's predation. Report to FBI IC3. Platforms: Ban the tag. Parents: Monitor Discord/Roblox. Knowledge severs the pipeline. The cycle ends now.

Section 1: DPOS Origins – Forged in UTPP's Fractured Wake

DPOS didn't spring from nowhere. It was born from the ashes of UTPP (UtubeTrollPolice), a chaotic 2011 troll group that devolved from GoAnimate skits into a decade of digital toxicity. By mid-2023, UTPP's internal wars—Hyper Bat Mapping's betrayal and StrongMoonMan's counter—splintered it into offshoots. DPOS emerged as the "extremist arm," founded amid that infighting as a self-proclaimed "hardcore" enforcer against "degeneracy" (anime, LGBTQ+ content, fandoms like FPE and Gacha). It inherited UTPP's raid tactics but amplified them with ideological venom, posing as moral guardians while hiding grooming and hate.

TomasThyGreatest (Brazil) was the architect. A UTPP recruit since 2022, he seized the moment in July 2023 to declare DPOS, branding it with a burning anime eye logo. His X (@TomasThyGreatest) spewed Nazi lingo, tying "policing degeneracy" to 764 nihilism. Early ops: Discord spams, YouTube doxxes, FPE forum vandalism (Miss Circle gore edits, October 3, 2025). Allies like ZTTP and YFGA shared Telegram for "clout"—gore trades masking CSAM.

Thousands flooded the servers. Kid recruits (14 and under) were twisted into "evil monsters,". DPOS wasn't rebirth; it was evolution—UTTP's chaos hardened into a blade.

Section 2: The Rise of DPOS – From Raids to Radicalization

DPOS hit the ground running in mid-2023, midwifed by UTTP's collapse. Tomas positioned it as the "pure" successor, "policing" anime and LGBTQ+ spaces with raids that blended humor and hate. Discord became the fortress: thousands joined, spinoffs like AUTTP infiltrated by ex-members. YouTube bans (OfficerSlappy) and X reports (October 3, 2025) slowed them, but resilience came from manipulated minors—fed "degenerate" slurs, death threats, cult chants.

Tomas' ascent was swift. By 2024, he was Führer, feeding a storm of neo-Nazi rhetoric and 764 ties. Leaks showed alts building a "footprint" for tracking (October 13 chats). Operations escalated: psychological ops like FPE targeting (doxxing Katie, minor harassment, echoing UTTP's Gachafall hacks). "Degeneracy" became code for anything non-conforming—anime eyes, rainbow flags. By 2025, raids fed grooming: kids lured for DDOS, broken for self-harm rituals under Spawnism. FBI bounties on Chezble linked to DPOS Telegram gore. The scale: 1,750+ DTAD accounts, thousands in servers, zero structure—just Tomas' venom steering the chaos.

The mask worked. "Anti-degen" veiled the blade: homophobia as "purity," racism as "jokes," grooming as "recruitment." Parents saw clout-chasing. Platforms saw fandom beef. But peel it back, and it's a hub for depravity—neo-Nazism, anti-Christianity, O9A bonds. Reddit's r/anti_uttp branded DPOS the "depraved core," perpetuating spinoffs like ZTTP. It thrived on the lie: protectors, not predators.

Section 3: The Mask Cracks – Crimes, Exposure, and Collapse

The facade held until November 2025, cracked from repeated exposure and callout from our service. 72 hours of relentless exposure. Swatting orders ("respond or I send pizza") and murder plots ("super soldier st#k!!! or force surrender") fed the pipeline: UTTP lures, DPOS hooks, 764 harvests. Zytherox's eight-year-old grooming brags, Chezble bounties, #SHTWT carvings—all traced to DPOS Telegram. The "anti-degen" tag? Shattered. X Legal's 1 GB packet + IC3 filings exposed the ring. Tomas perma-nuked. RevGirl ghosted since October 28, fleeing groupchats. Lola's cope is buried at 0 likes. Servers burned: DPOS main banned, 4+ hubs gone. Firebase a laughing stock, legacy as "depraved hub" eternal.

- NoTrac3's DTAD database mapped 1,750+ accounts. The mask is ash. DPOS can't rebuild—platforms flag "anti-degen" as harassment. The cycle ends: report to IC3, monitor Roblox/Discord, protect the vulnerable.

Section 4: The Human Toll and the Path Forward

DPOS/UTTP weren't pranks—they were gateways to trauma. Kids groomed for DDOS became self-harm victims; FPE faced doxxing suicides. Parents missed it until too late.

- Awareness severs the pipeline. Platforms: Ban the tags. Feds: Prosecute the Führer. NoTrac3 warns: Knowledge ends the cycle. Share this brief. Watch them burn.

Executive Summary

Detailing the origins, evolution, and impact of DPOS (Degeneracy Police Order State), a dangerous online harassment group led by TomasThyGreatest. As a splinter branch of the infamous UTTP (UTubeTrollPolice), DPOS has escalated from juvenile trolling to a hub for doxxing, grooming allegations, neo-Nazi rhetoric, and ties to extremist cults like 764 and Spawnism. With NoTrac3's ongoing investigations revealing 1,750+ linked accounts in DTAD, this history exposes DPOS's role in the "global assault on youth" – a pipeline turning kids into tools for chaos. Awareness is key: report threats to FBI IC3 and platforms like Discord/YouTube. Protect the vulnerable – knowledge ends the cycle.

Section 1: The UTTP Foundation – The Mother of Modern Trolling

To grasp DPOS, understand its parent: UTTP, the UTubeTrollPolice, a "cartoon police" group that birthed a decade of digital toxicity.

- **Origins (2010-2011):** Founded February 12, 2011, by Thomas Parkinson (aka Tommy Parky or southparkstudiosable), an 11-year-old from a UK hacking circle called Ares (rivals to PurpleHelmetAvenger). Parky created the first channel, Officer Johnny UtubeTrollPolice, using GoAnimate/Vyond videos to "arrest" trolls. It started as satirical anti-trolling but quickly devolved into spamming fandoms like GoAnimate and FNAF on Google+.
- **Early Growth (2013-2015):** Stephen Larson joined in 2013, launching anti-fandom campaigns against FNAF, bronies, and VGCP (an anti-UTTP group). By 2015, Larson seized control, escalating raids on YouTube and Google+, blending humor with hate. Lingo like "FRIES R UP," "UTTP Club," and "BIG & STRONG" became memes, while Nazi/KKK nods emerged in "artwork."
- **Peak Chaos (2020: Gachafall):** COVID lockdowns swelled ranks to thousands. Sherbase12 led "Gachafall," hacking 50+ Gacha Life channels, tricking creators into sharing logins. Propaganda remastered old icons (e.g., Officer Gacha Life Sucks), but infighting exploded – Hyper Bat Mapping's 2023 betrayal and StrongMoonMan's counter marked the faction wars.
- **Decline and Splinters (2022-2025):** UTTP fractured into AUTTP (anti-UTTP, infiltrated by ex-members) and spinoffs like ZTTP, YFGA, AOTP. By 2023, bans (e.g., Hyper Bat's alt termination) and exposures (OfficerAPC's pedo leaks) gutted it. Today, UTTP's legacy is

a blueprint for depravity: homophobia, racism, and grooming, with spinoffs endorsing pedophilia/Nazism.

UTTP's scale: Millions of views on raid videos, thousands of members at peak, but zero formal structure – just chaotic kids (mostly 14 and under) chasing clout.

Section 2: DPOS Emerges – UTTP's Extremist Offshoot

DPOS branched from UTTP's 2023 infighting, forming mid-2023 as a "hardcore" arm "policing degeneracy" (anime, LGBTQ+ content). Led by TomasThyGreatest, it amplified UTTP's raids with ideological venom, targeting fandoms like FPE and Gacha.

- **Formation (Mid-2023):** Tomas, a UTTP veteran (~2022 recruit), founded DPOS amid UTTP's Hyper Bat betrayal (July 2023). Posing as "anti-degenerate," DPOS hit Discord/YouTube with spams, doxxes, and "ops" like FPE forum vandalism (e.g., Miss Circle edits, October 3, 2025). Early allies: ZTTP/YFGA, sharing Telegram for gore/CSAM "clout."
- **TomasThyGreatest's Rise:** Tomas Rivera (Brooklyn, NY; T-Mobile pings, Brazil suspicions per doxes) became "Führer" by 2024. His X (@TomasThyGreatest) spews Nazi lingo, tying to 764 nihilism. History: UTTP foot soldier, DPOS founder, exposed for grooming (e.g., 8-year-old attempts via Zytherox links). Leaks show his alts building a "footprint" for NoTrac3 tracking (October 13 chat).
- **Operations and Escalation (2023-2025):** DPOS raids escalated to psychological warfare – "degenerate" slurs, death threats, and cult recruitment. FPE targeting (doxxing Katie, minor harassment) linked to UTTP's Gachafall tactics. By 2025, DPOS endorsed pedophilia/Nazism, feeding 764/Spawnism pipelines (e.g., self-harm rituals).
- **Scale and Impact:** Thousands in Discord servers; spinoffs like AUTTP infiltrated by ex-DPOS. YouTube bans (e.g., OfficerSlappy) and X reports (October 3, 2025) chipped away, but resilience came from kid recruits (14 and under), manipulated into "evil monsters" (m77u1n chat).

Section 3: DPOS's Dark Ties – The Cult Pipeline

DPOS isn't standalone; it's a feeder for horrors like 764 and Spawnism, blending trolling with grooming.

- **UTTP-DPOS to 764:** UTTP raids lure kids to Discord, where DPOS escalates to 764's sextortion (love-bombing to CSAM). Zytherox (ex-UTTP/DPOS) admitted 8-year-old grooming; 764's 250+ FBI probes include UTTP alts (Europol 2025).

- DPOS to Spawnism: DPOS "acquires" Spawnism for harm – Roblox lore twisted into self-harm carvings (#shtwt, July 2025). FBI bounties on Chezble tie to DPOS Telegram gore shares.
- Broader Web: Nazism/anti-Christianity bonds them to O9A (764's root). Spinoffs (ZTTP, YFGA) perpetuate, with DPOS as the "depraved" hub (Reddit r/anti_uttp).

Section 4: The Human Cost – Why People Need to Know

DPOS/UTTP aren't "pranks" – they're gateways to trauma. Kids groomed for DDOS become self-harm victims; fandoms like FPE face doxxing/suicides. Parents miss it until too late – Awareness ends the cycle.

WARNING – knowledge saves lives. Share, report, protect.

Prolonged Abuse Campaign Against The Content Creator Silly Pau

Viewer Discretion is Advised!

This section covers disturbing, offensive, and inappropriate subjects including: harassment, revenge porn, doxxing, swatting, gore, bestiality, zoophilia, animal abuse, attempted murder, violent threats, shooting threats, impersonation, violent extremism, hate crimes, fraudulent lies and slander, and weaponized grooming/pedophilia targeting Silly Pau.

Note: As of September 8, 2025, the original documentation of this case is no longer managed by Pau and is instead overseen by a trusted second-party group in contact with the proper authorities. This change was made so that Pau can step back and find rest after the prolonged harassment and abuse surrounding this case. Nobody deserves the cruelty and torment she has been forced to endure.

Summary of the Campaign

The prolonged harassment campaign against content creator Silly Pau was orchestrated and enabled by Tomas (DPOS leadership) and his inner circle. The abuse included:

- Coordinated distribution of extreme gore, shock content, and AI-generated revenge-porn style edits
- Doxxing and face-reveal threats
- Swatting attempts and real-world violence threats (including shooting threats and animal cruelty)
- Impersonation, fraudulent slander, and false accusations

- Weaponized grooming and extremist rhetoric used to justify the attacks

The primary motivation appears to be transphobia and personal fixation, with Tomas admitting in public posts that the campaign was not based on any legitimate concern but rather dislike of Pau's identity.

Key Evidence & Documentation

Full archived evidence, screenshots, timestamps, and victim statements are compiled in the following public document (viewer discretion strongly advised):

- [Full Record of Targeted Abuse Toward SillyPau](#)

If you have additional evidence related to this case, please forward it securely to the designated contact in the document.

Assessment

This campaign represents one of the most sustained and severe examples of targeted minor abuse linked to DPOS leadership. The tactics match documented 764-derived patterns (psychological terror, blackmail escalation, victim inversion) and demonstrate clear intent to cause real-world harm. WinterGate Intelligence Collective (WIC) continues to monitor related activity. Report any new threats immediately.

(Prepared for informational and protective purposes only. All personal identifiers redacted per WIC policy.)

~ |YouTube DATA|:

DATE:[Sun, Jul 13, 2025]

Link: www.youtube.com/@tomasthegreatest0

Country: United States

Creation: Joined May 14, 2024

YT: 27 subscribers - 7 videos - 2,219 views

|— PRIMARY SUBJECT: TOMAS THY GREAT (ttg55555)

|— DIGITAL:

- |— CashApp: \$tomasNYC
- |— ProtonMail: [REDACTED]
- |— Discord UID: 1091123456998854766

- Financial assets (CashApp/PayPal/BoA)

- Psychological Profile:

- » Reactionary decision-making
- » Obsession with "doxxing superiority"
- » Confirmed stimulant abuse (Adderall)

Email Patterns Observed:

- Privacy-focused providers: ProtonMail (indicates anonymity/opsec awareness)
- Standard providers: Gmail, Outlook
- Consistent username pattern across multiple services (e.g., variants of "ttg" and "tomasthy" themes)
- Multiple accounts created 2024–2025 timeframe
- No direct addresses disclosed — patterns only.

Psychological/Behavioral Profile:

- Obsession with doxxing superiority and control
- Manipulative escalation patterns

- Confirmed indicators of stimulant abuse

(Note: All direct personal identifiers (names, full emails, locations, phones) fully redacted in the public version. Focus is on open-source digital patterns and threat indicators only. Raw data retained internally for alliance reporting.)

Association Risk

Why Association with DPOS Leadership or Affiliates Indicates Risk Threat

Assessment Addendum – *Association Risk*

No legitimate community, com clan, or individual has any valid reason to ally with, associate with, or tolerate known DPOS leadership figures or their direct affiliates unless they are willing to accept significant reputational, ethical, and security risks.

Key Reasons Association is Indefensible

- **Documented Predatory Behavior:** DPOS leadership has been directly linked to grooming minors, blackmail, encouragement of self-harm, distribution of CSAM-adjacent material, and prolonged campaigns of psychological terror (including the well-documented case against content creator Silly Pau). These are not isolated incidents – they are core operational tactics.
- **Adult Exploitation of Minors:** Confirmed adult leadership targeting vulnerable youth for recruitment into abusive activities removes any "youth misunderstanding" defense.
- **764-Derived Tactics Confirmed:** The group's playbook matches documented 764 patterns with critical severity across all major categories (love-bombing → escalation → blackmail → humiliation).
- **Real-World Harm:** Swatting attempts, shooting threats, animal cruelty threats, and coordinated doxxing demonstrate intent and capability to cause harm beyond online spaces.

Association Red Flags

Any com clan, mock-gov, roleplay group, or individual that maintains alliances, shared members, joint operations, or mutual tolerance with known DPOS leadership or affiliates should be considered **high-risk** for the following reasons:

- **Complicity Risk:** Continued association signals acceptance or endorsement of the above behaviors.
- **Recruitment Pipeline Risk:** DPOS uses alliances to expand reach and recruit new members into abusive cycles.
- **Reputational Contagion:** Public or private ties damage credibility and expose the associating group to blacklisting by protective networks (including WIC, UNIPOL, and allied communities).
- **Security Risk:** Shared servers or members create infiltration vectors for raids, gore spam, or worse.

Conclusion

There is no justifiable reason for any well-intentioned group or individual to maintain ties with DPOS leadership or its known affiliates. Doing so indicates either:

- Willingness to overlook or enable predatory behavior, or

- Lack of due diligence regarding threat actors.

Legitimate communities prioritize safety, ethics, and protection of members — especially minors and vulnerable users. Association with DPOS is incompatible with those values.

Recommendation

- Immediately review memberships, alliances, and shared servers for DPOS-linked individuals.
- Enforce zero-tolerance policies for 764-adjacent or grooming-related activity.
- Report credible threats to platform moderators and relevant authorities.
